

## Leverage Reusable Content and Conditional Logic to Save Time and Improve Accuracy

Static Document Templates  
One per scenario

vs.

Flexible Document Templates  
One per many scenarios

Documents such as employment contracts, offer letters and compensation statements may vary from employee to employee. Different employment conditions, policies or statuses may require variable document output. Creating multiple, fixed-content document templates to accommodate each case can be time consuming and assumes a user will choose the right template.

With Strato, one flexible document template can be used for multiple scenarios. Strato's unique built-in conditional logic enables a single template to create employee-specific output, language and content, including signature blocks, images and paragraphs. By reducing the risk of using an incorrect static template, Strato increases accuracy and employee satisfaction.

Strato allows you to easily create documents and templates with different formats and varied content for each business purpose.

Strato documents are generated in real-time and always contain the most up-to-date employee data and information.

Strato's reusable content and conditional formatting options reduce document setup time by more than 80%.

Strato's ease-of-use means users can begin creating documents in minutes. To get started with Strato or to request an in-depth demonstration, contact SpinifexIT at [info@StratoHCM.com](mailto:info@StratoHCM.com) or visit the Strato page on the SAP Store.
